pulsus

Intelligence and security for high-performance enterprise mobility

The best solution for device management and teams' productivity.

Pulsus' technology enables companies to reach more **productivity, efficiency, competitive intelligence and data safety** through an agile, intuitive and built from the ground mobile device management solution.

+ 900 customers

+ 900k managed mobile devices...

## ...distributed in over 30 countries worldwide

Founded in 2016, Pulsus' technology is already used by important companies in Latin **American, Europe and Africa,** enabling all types of teams to benefit from remote setup and administration of corporate devices in a quick, easy and safe way.

Boosting Business

More agility, easiness and less costs.

We help companies invest time and effort in what really makes a difference in their business.

Boosting People

Helping people that help other people.

Field staff as technicians, sellers, drivers and deliverymen need efficiency and agility to stand out in a competitive market.

Discover **Pulsus'** features.

Customizable launcher
Custom environment with shortcuts to mains apps and device settings.

Online inventory
Manage the amount of devices that are being used and check the employees responsible for using them.

Maps and track
Locate devices in real time. View the route taken by each registered device, distance traveled, approximate trajectory and number of check-ins.

Install and update apps remotely
Securely install and update apps remotely and online, and even block unwanted apps.

Data consumption
Analyze data consumption in detail. Check and track consumption across network types, apps and individually, device by device.

Driver mode
Ensure that the device only runs applications such as GPS while traveling above a specified speed.

HIGHLIGHTED FEATURES

REMOTE CONTROL — Securely help users from anywhere with real-time screen sharing and remote click.

TERMS OF USE — Create, send, and allow users to remotely sign terms of use, information security, use of devices, among others, ensuring compliance alignment.

SIGNAL MAP — Analyze carrier signal coverage through an accurate and interactive map.
